TECHNICAL SKILLS

Advanced computer skills: IBM SPSS, QSR NVIVO, Stata, WordPress, Wix.com, NEOGOV HR Software, MS Office Suite (Word, Excel, PowerPoint, Outlook), Zoom, Google Business Suite, Typing speed: 90 wpm.

PERSONAL STATEMENT

I am a public health researcher with a background in the social sciences. My research focuses on suicide and mental health, specifically, the socioenvironmental predictors and impact of suicidal ideation, suicide death, and suicide clusters within adolescent communities. With my interdisciplinary training in psychology, Spanish, sociology, and public health, and my first-hand experience supporting a loved one through a suicidal period, I am committed to using evidence-based decision-making for translating research into action steps for preventing suicide.

In my professional role, I support a diverse team of researchers in management and outcomes of large international multicenter NIH-funded clinical trials. I collaborate with internal stakeholders and external research partners, including the Center Director, Principal Investigators, Clinic coordinators, Research Administration, and Grants and Contracting to track funds and monitor progress for sponsored projects.

My teaching style is personable and flexible. I employ a flipped classroom blended learning model for virtual content delivery. I encourage student-to-student engagement and workshoping of concepts, whereby I am simply a guide. I aim to empower students and resume clients with a resource toolkit for problem-solving, critical-thinking, and self-affirming skills that they need to work well in interdisciplinary, collaborative groups, confidently marketing their roles and their skills.
